

ACCE has already reduced the cost of ownership for many of our clients by automating the manual and cumbersome tasks of migrating changes from development to production. All of our clients have seen an efficiency increase of at minimum 70% and some as high as 95%. The following report illustrates time to market and the value Client X can expect by leveraging the ACCE product.

## By the Numbers

Arbiter Software's use of the ACCE Product for Cost Containment

Internal Rate of Return **83%**

**14** Months Time to value, or pay-back period for the software

Cost: Benefit Ratio **1 : 2.07**

**\$313,676**  
Average annual benefit

### THE PROJECT

Client X is looking to leverage the ACCE software product to help contain cost, pass stringent audit requirements and improve efficiency within their Workload Automation Environment. The software needs to be instrumental with cost reduction but cannot sacrifice the current service to the business as a result.

### THE RESULTS

Arbiter Software's ACCE solution will synchronize all of Client X's processes into one.  
60% decrease in manual effort

### Estimated Project Duration

**4** Weeks Time for Client X to implement the software
